Dear Captain Peter Boynton,

As a resident of Long Island and a frequent boater on the Long Island Sound, I am opposed to a liquefied natural gas facility being proposed. As the Island becomes more more populated and industrialized, there is a real concern for the environmental health of the area. I feel the government should be turning to and investing in more environmentally sound solutions to fulfill our energy needs. As our representative, please act in the best interests of our unique environment and prevent the building of a LNG facility.

Sincerely,

William J. Brown

Captain Peter Boynton,

Having just found out about the Proposed Liquefied Natural Gas Facility to be nine miles off of Rocky point on Long Island, I have to say that I am concerned about this. Not only would this be an eyesore, but this would be endangering all of the coastline and the natural and unique environment. The Sea turtles and the many birds would become an endangered species. The many people that enjoy the sound during not only the summer but though out the year would not be able to do this. Many people come to live on the Island because of the uniqueness of the island. Please respond in writing informing me of your position on this matter. Thank you for any consideration given to this matter.

Sincerely,

Anita G, Curran

SEP 14 2005

A LNG facility endangers the health and safety of the Long Island Sound and should **NOT** be built. Me and my family swim in these water and I want to know that they are safe and clean, so we can enjoy it. We would like to see that our waters stay clean and safe so that we can enjoy our daily lives on Long Island. It doesn't make sense to us why someone would want to ruin something so perfect.

Attn.: Captain Peter Boyton

Dear Captain Boyton:

I am writing to you about my concerns with the Liquified Natural Gas Facility proposed for Long Island Sound. This proposed facility endangers the health and safety of Long Island Sound and should not be built. This facility limits public access and sets a dangerous precedent of industrializing the sound. I would appreciate a response regarding your position with this project.

Very truly yours,

Dear Captain Peter Boynton,

I am writing this letter to find out what exactly is your position on a proposed liquified natural gas facility in the Long Island Sound. As a taxpayer and resident of Long Island I am against any such facility being built here on our sound. An LNG facility endangers the health and safety of Long Island Sound. This facility will limit public access and sets a dangerous precedent of industrializing the Sound. The negative environmental impacts of such a facility will be detrimental to all life here on Long Island. Please respond in writing as to what your position is on this matter. Thank you for your time.

Sincerely,

DEAR CAPTAIN BORTON

I GASPAR LUCA AM OPPOSED TO THIS LIQUEFIED NATURAL GAS FACILITY AND FEEL THAT IT DOESNT BELONG IN LONG ISLAND SOUND OR ANYWHERE FOR THAT MATTER. IT IS A HEALTH RISK AND THAT INDUSTRIALIZATION OF THE SOUND COULD BE A POTENTIAL DISASTER IN EVERY SENSE. I HOPE THAT OUR ACTION PREVENTS THIS POTENTIAL HAZARD TO OUR COMMUNITY. THANK YOU

Sincerely Gaspar Luca

Dear ^{CAPT.} ~~Mr.~~ Boynton,

"Under current practices, both Federal Energy Regulatory Commission (FERC) and State authorities monitor the siting of new Liquefied Natural Gas (LNG) facilities. FERC recently attempted to usurp local authority by asserting its authority as the sole designator and approver of LNG facilities built and operated in the United States. In a November 2004 Congressional Appropriations bill, Senator Pete Domenici (R-NM) inserted three paragraphs of language granting FERC authority over State powers to site LNG facilities. There was no debate and several officials, including Sen. Lincoln Chafee (R-RI) and Rep. Barney Frank, (D-Mass); later expressed they were not aware of the change when they supported the bill. This debate continues with a new bill, which is expected to be introduced early in the 2005 session that would cement FERC control over LNG terminals. **Granting unprecedented authority to FERC to cite LNG facilities--independent of state, county, and local entities that directly represent the American public-- violates FERC's mission, state's rights, and the public's trust"**

- Position Paper by Citizens Campaign for the Environment

As a Long Island, NY taxpayer **I** find it reprehensible that our local government would even consider giving authority and or approval for the creation of a facility that endangers the health and safety of the Long Island Sound. In light of the recent catastrophic events of Hurricane Katrina we can see the effects of the introduction of chemicals and the impact that they have on the environment in the event of seepage, spills or mishaps.

Please consider the precedent and environmental impact that this industrialization of the Long Island Sound could cause. **I feel that this facility should not be built.** I hope you share my feelings.

Sincerely,

DEAR CONCERNED

SEP 14 2005

Long Island has been an experiment
gone wrong for years. I've seen Lilco try
to build a nuke plant that would of
raised the surface temperature of the sound
1°C how's that for florida weather.
NORTHVILLE gas company can't contain a gas
spill in East Setauket now the ground
aquifer is polluted. Hey I have an idea
lets call the Barge & Little Tsunami because
if there's ever an human error and those
tanks fail I'm sure the wave will hit
Long Island + Connecticut and also take out
the Nuclear plant. Lets avoid this situation
STOP NOW + THINK!

To whom it may concern,

A "Liquefied Natural Gas Facility" should not be allowed to be build in the Long Island Sound. It would endanger the health and safety of the Long Island Sound, it's marine life and it's eco-system. It is unthinkable to build such a facility. Please do not let it be built.

Re: Proposal for Industrialization of Long Island Sound

Dear Captain Boynton,

Many parts of New Jersey have become a pollution nightmare due to the industrialization of the area. You not only see it, you smell it. Don't let the money mongers destroy Long Island any further. Stop the natural gas facility. We pay the highest taxes in the nation and now this, why should any of us stay on Long Island if this kind of facility is permitted. Enough is enough with destroying our natural habitat. Our air quality and safety must be secured.

Respectfully requested;

I am writing you regarding the proposed Natural Gas facility that is being proposed for Long Island Sound.

I am opposed to the construction of such a facility for any number of reasons including that the facility could endanger the health and safety of Long Island Sound and would potentially set an unwanted precedent of industrializing the Sound.

I use the Sound for recreation 8 months out of the year and I do not want any potential hazard to the facility from such a facility. I remember just a few years ago when the Key Span platform in Long Island Sound was the site of an explosion that resulted in at least one death. I cannot and do not want to hypothesize what the result of an explosion at this new facility would be.

Sincerely,

Jeff Weiner
